PROFESSIONAL SUMMARY

Computer Engineering student with solid experience in Networking (TCP/IP, OSI models) and technical support. Highly proficient in computer hardware assembly/maintenance and customer service.

EDUCATION

B.S. in Computer Engineering	2022 - 2027 (Expected)
Universidade do Estado de Minas Gerais (UEMG)	Divinópolis, MG, Brazil
– Developed a grading and attendance management tracking system using Java with RMI; – Created a vector-based search engine system utilizing C#; – Developed a Windows game using the Godot Engine to practically apply Blockchain concepts; – Designed an OOP project for library catalog management (books, maps, reports, theses) leveraging inheritance and polymorphism.	

PROFESSIONAL EXPERIENCE

Engineering Intern - IP and Services	Aug 2025 - Jan 2026
Master Internet	
– Participated in network equipment migration, replacement, and testing/homologation processes. – Drafted technical and operational reports for network infrastructure, focusing on monitoring and documenting scheduled configuration changes (GMUDs). – Managed inventory and controlled network materials and equipment. – Developed network topology diagrams and technical configuration documentation.	
Customer Experience Representative	Mar 2024 - Jul 2025
Master Internet	
– Analyse customer database records and spreadsheets to deliver personalized account tracking. – Assisted in managing billing workflows and customer service support processes. – Acted strategically in customer retention and loyalty initiatives, contributing to enhanced experience and service quality.	

COURSES AND CERTIFICATIONS

Complete Front-End Web Development Course – Danki.Code	2026
PC Assembly and Maintenance Course – Danki.Code	2026
Networking Fundamentals – DIO	2025
Core Concepts of AI – DIO	2025
Programming Logic Course – Danki.Code and DIO	2024
English Language Program (Books 1 and 2) – Prepara Cursos	2020
Mobile Apps and Game Developer Program – Prepara Cursos	2019

TECHNICAL SKILLS AND INTERESTS

Networking Knowledge: Computer Networks, OSI Model, TCP/IP Suite, Routing, Network Assets Configuration, Change Management (GMUD), Network Topologies
Hardware and Systems: PC Assembly and Maintenance, Windows and Linux Operating Systems
Tools and Scripting: Microsoft Office (Word, Excel, Powerpoint), Git, GitHub, Bash/Shell Scripting
Programming Languages: Java, C, C++, Python, HTML, CSS, and JavaScript
Soft Skills: Technical and Customer Support, Interpersonal and Written Communication, Organization, Responsibility, Teamwork
