PROFESSIONAL SUMMARY

Computer Engineering student focused on Back-end development (Java/C++). Experience as a Full Stack developer and in mobile projects. Solid understanding of OOP, logic, and version control with Git.

EDUCATION

B.S. in Computer Engineering

2022 - 2027 (Expected)

Universidade do Estado de Minas Gerais (UEMG)

Divinópolis, MG, Brazil

- Developed a grading and attendance management tracking system using Java with RMI;
- Created a vector-based search engine system utilizing C#;
- Developed a Windows game using the Godot Engine to practically apply Blockchain concepts;
- Designed an OOP project for library catalog management (books, maps, reports, theses) leveraging inheritance and polymorphism.

PROFESSIONAL EXPERIENCE

Engineering Intern - IP and Services

Aug 2025 - Jan 2026

Master Internet

- Participated in network equipment migration, replacement, and testing/homologation processes.
- Drafted technical and operational reports for network infrastructure, focusing on monitoring and documenting scheduled configuration changes (GMUDs).
- Managed inventory and controlled network materials and equipment.
- Developed network topology diagrams and technical configuration documentation.

Customer Experience Representative

Mar 2024 - Jul 2025

Master Internet

- Analyzed customer database records and spreadsheets to deliver personalized account tracking.
- Assisted in managing billing workflows and customer service support processes.
- Acted strategically in customer retention and loyalty initiatives, contributing to enhanced experience and service quality.

COURSES AND CERTIFICATIONS

Complete Front-End Web Development Course – Danki.Code

2026

Networking Fundamentals – DIO

2025

Core Concepts of AI – DIO

2025

Programming Logic Course – Danki.Code and DIO

2024

English Language Program (Books 1 and 2) – Prepara Cursos

2020

Mobile Apps and Game Developer Program – Prepara Cursos

2019

TECHNICAL SKILLS

Programming Languages: Java, C++, C#, C, Python, JavaScript, HTML, CSS

Frameworks and Engines: React.js, Godot Engine, GML

Development Tools: Git, GitHub, Visual Studio, Visual Studio 2022, Microsoft Excel

Technical Knowledge: Object-Oriented Programming (OOP), Programming Logic, Computer Networks, OSI Model, IP Protocol, Computer Hardware Assembly and Maintenance, Windows and Linux Operating Systems

Soft Skills / Competencies: Interpersonal and Written Communication, Customer Support and Service, Organization, Responsibility, Creativity
